

Use PaymentVault™ to attain your PCI compliance.

PaymentVault™ provides a safe and secure storage mechanism for credit card account numbers separate from customer's personally identifiable information.

PaymentVault inter-operates with many different operating systems, applications, and processing services. Additionally, Auric's Trevance and CN!Express CX-7000 payment processing solutions have off-the-shelf support for PaymentVault technology.

No matter where your business takes you, PaymentVault is ready.

Stores All Payment Methods

- Credit Cards
- Checks
- Debit Cards
- Bill Me Later
- PayPal
- Custom

PCI Compliance Points:

- Data retrieval requires Unique Tracking ID
- IPs must be registered with server
- Communication with server via secure tunnels
- No bulk retrieval operations
- Audit Trails
