

## CORE COMPETENCIES

## COMPANY DATA

### Thieves can't steal – what isn't there!

The AuricVault® tokenization service secures your vitally sensitive financial and personal data. Sensitive data is replaced by tokens, random strings of numbers and letters that have no relationship to the stored data. Your original data is stored off-site in Auric's secure service. If someone steals all your tokens, they still do not have any of your sensitive data.

Tokenization provides data separation to ensure that no single entity stores all the data. With Auric's unique tokenization solution you can easily share sensitive data with multiple parties.

Auric currently stores over 310,000,000 tokens for 98 companies.

- Retain your data ownership
- Move vital sensitive data out of your environment
- Tokenize up to 4,000 characters of data per token
- Safely exchange data with business partners
- Browser-Side tokenization and detokenization
- Tokenize fingerprint templates
- Fail-over storage for your primary sensitive data
- Can remove your servers from PCI/PHI/PII scope

### DIFFERENTIATORS

- Fine-grained data access permissions.
- Proxy option for tokenizing in-bound and out-bound data transfer boundaries.
- Batch and real-time tokenization.
- Public/private key encryption options.
- Custom data security solutions.

Auric Systems International (ASI) was established in 1987 as a software development firm.

Since 1994, ASI's focus is on payment and data security products.

In 2013 ASI released the general-purpose AuricVault® tokenization service for all industries.

Our unique tokenization service secures all types of sensitive data and simplifies your Personally Identifiable (PII), Payment Card (PCI), and Protected Health (PHI/HIPAA) Information compliance.
